Appendix H: Program Course Sequence
The purpose of this document is to help guide students through the Ph.D. in Special Education program. While most major points are outlined in this document, the Department of Counseling and Special Education reserves the right to change and update information and requirements. It is the responsibility of all doctoral students to keep abreast of program requirements and changes in the program.

Philosophy

The Doctor of Philosophy in Special Education program is designed to prepare researchers who are ready to assume leadership positions at Universities, Research Centers, State Departments of Education, and/or other educational or government institutions. The program is designed to provide a solid research foundation, a broad perspective for theoretical analysis of research in the field, and structured opportunities to develop expertise in research, teaching, and policy/service.

The conceptual framework for the Ph.D. program is PRACTICE (Practice, Research, and Academic Coursework in Teaching, Implementation, and Community Engagement). The PRACTICE conceptual framework is in alignment with the mission of Virginia Commonwealth University (VCU), the School of Education, and the Department of Counseling and Special Education (CNSE). Grounded in core knowledge through focused coursework and an emphasis on both “learning” and “doing”, doctoral students are mentored by experienced faculty who are engaged in school-based research and dissemination via research internships, preservice and inservice educator development via teaching internships, and the large-scale transfer of learning and development of 21st century skills via policy or service internships. The PRACTICE framework directly addresses the growing need for new teacher educators and researchers who can prepare the next generation of teachers and researchers for the current and anticipated needs of students in diverse environments. With a focus on 21st century competencies, this conceptual framework emphasizes knowledge creation and sustainable transfer in authentic environments, systematic mentoring and apprenticeships, and leadership development within community research, personnel development and dissemination initiatives.

The course requirements for doctoral degree may vary from student to student based on individual career goals. The student's doctoral advisory committee has the responsibility for recommending individual courses of study for each doctoral student. A minimum of 59 credits beyond the master's degree is required for the Ph.D. in Special Education. A student’s advisory committee may recommend additional coursework to provide further expertise in special education content, research methodology, or theoretical knowledge needed to meet individual career goals.

Admission

The Department of Counseling and Special Education is committed to fostering a graduate student body that reflects the diversity within special education and within the country. We want to further develop a higher education community whose work will contribute to the advancement and betterment of individuals with disabilities along with their teachers and family members. To
identify such persons capable of transforming and improving the needs within special education, a number of criteria will be used. Students applying for admission to the Ph.D. in Special Education must:

1. Meet the School of Education and Graduate School criteria for admission (check your entry year in the Graduate Catalog).

2. Supply a written statement of professional goals including:
   a) professional goals and specialized interest areas.
   b) skills and/or characteristics which will facilitate the applicant's pursuit of the goals cited.
   c) potential faculty with whom the candidate would like to work and why.

3. Participate in a personal interview by special education faculty. Although an in-person interview with the candidate is highly preferred, a phone or video interview with the candidate is acceptable.

   Applicants should be prepared to answer questions similar to the following:
   ● What was the nature of your academic preparation and interests during your baccalaureate/master’s program?
   ● What factors influenced your decision to pursue special education as a career?
   ● What factors influenced your decision to pursue a doctoral degree?
   ● What type of job do you expect to apply for upon program completion?
   ● Tell us about your experiences working with children and youth with disabilities.
   ● What is a major change you believe will occur in the special education profession in the next decade?
   ● What do you believe your strengths are when it comes to being a doctoral student? What skills would you need to work on?
   ● What else do you wish to have the selection committee know about you?

4. Provide a minimum of three letters of recommendation from individuals in a position to evaluate an applicant's graduate study potential and/or research experience. Applicants should consider the references from prior faculty instructors or advisors, or from those who understand the requirements of a doctoral program (and specifically, the program here at VCU) either by having participated as a student themselves, or as an instructor in a course at the advanced graduate level. Letters that address your commitment to students with disabilities, your classroom teaching ability, or other personal or professional skills unrelated to doctoral-level work and research are not helpful for the admissions committee.

5. Submit official transcripts of graduate work completed. These transcripts will be evaluated by department faculty and prerequisite and/or co-requisite coursework may be required. Applicants should have completed graduate-level coursework in research methods and statistics. In addition, applicants who have not completed a master's degree in special education may be required to take additional coursework to familiarize themselves with the content they may need to conduct research and/or teach courses in the field.

**Doctoral Program Overview**

Upon admission, our students’ main responsibility will be to complete initial course work while reflecting on career goals, research ideas, and selecting a doctoral advisory committee.
During this period, students will be interacting and collaborating with professors in the department through coursework and other professional activities. These interactions are opportunities for multiple experiences to work alongside professors in the areas of teaching, research, and service, and guide students as they begin their own work. These co-curricular experiences are as important as the coursework necessary to complete your degree, as they serve as the evidence that you are ready for the next stage in your professional career.

**Competencies: Ph.D. in Special Education**

Students in the Ph.D. in Special Education program demonstrate their preparation to become tenure-track faculty members, researchers, and leaders in the field through major assignments in courses, as well as in completing activities for their professional portfolio. They follow procedures that are commonly used in universities for annual evaluation of faculty, by updating their professional vita and compiling examples of their work. These professional portfolios will be evaluated on an annual basis by the student’s Advisory Committee and other program faculty as appropriate. The list of required portfolio artifacts can be found in Appendix C. In general, they demonstrate competencies in the following areas:

**I. Analytical and Writing Skills**
- Demonstrate general and applied knowledge of the different conceptual approaches to practices and research including global knowledge of different approaches
- Demonstrate a knowledge of the history and background of each approach to the field of special education and disability policy
- Demonstrate the ability to critically analyze research using different conceptual frameworks
- Demonstrate the ability to write a policy analysis that describes the impact of national policy at the national, state, local and individual levels
- Demonstrate the ability to critically analyze research literature
- Write a succinct, coherent, well-conceived synthesis of the literature

**II. Content Knowledge**
- Demonstrate knowledge of critical issues and trends in special education and disability policy through oral and written skills
- Demonstrate knowledge of leaders in special education & disability policy
- Demonstrate knowledge of the components of various disability policies at the national, state, local, and individual agency/organizational levels
- Demonstrate knowledge of the various accreditation bodies in the field of education, and particularly special education: be able to describe their role in development of a personnel development program at the university level
- Demonstrate knowledge of the components of a proposal for grant-funding for research, professional development, and policy research/demonstration projects
- Demonstrate knowledge of funding sources in the field of special education and related areas
- Demonstrate an understanding of the major research methodologies in the field, and in particular, of single subject research methodology
III. Professional Skills
- Develop professional skills including self-reflection of teaching and research skills
- Demonstrate the ability to teach at the university level, including the ability to assess student progress
- Demonstrate the ability to provide constructive feedback to students using the program clinical evaluation instrument
- Demonstrate the ability to accept and integrate constructive criticism into scholarly products and activities
- Demonstrate the ability to create, implement, and evaluate an inservice training program based on the needs of teachers and including evidence-based practices
- Develop an area of expertise that serves as a foundation for teaching, research, and policy advocacy
- Demonstrate the ability to disseminate information in the field through professional presentations, written manuscripts, and electronic means
- Demonstrate the ability to work as a member of a research team
- Participate in activities that are of service to the field, the community and/or the university
- Develop a detailed CV

Required Coursework: Ph.D. in Special Education

The following is the required coursework in the Ph.D. in Special Education program:

EDUS 608: Statistics for Social Research (3 cr.)
An intermediate-level statistics class focusing primarily on techniques of inferential analysis. The purpose of this course is to facilitate students' development of the skills required to come up with a research hypothesis and analyze data to confirm or deny said hypothesis. Students will conduct data analysis using the National Center for Education Statistics Educational Longitudinal Study of 2002. Students will specifically consider the development of theoretically grounded hypotheses and the use of a variety of statistical techniques to enable their testing. The class will focus in particular on multiple regression with two or more independent variables and the psychometric analysis of measurement scales intended to tap variables used in the models developed. Students will also consider curvilinear relationships, factor analysis and power analysis. Students who successfully complete the course should have the ability to analyze complex data sets and construct measures that enable the testing of hypotheses that advance theory, research and practice in the field of education.

EDUS 710: Educational Research Design (3 cr.)
An examination of quantitative research designs and concepts commonly utilized in conducting research in applied educational settings. Fundamental principles of research are extended to cover such topics as quasi-experimental and nested designs, experimental validity and alignment of statistical procedures with designs.
**EDUS 711: Qualitative Methods and Analysis (3 cr.)**
Examines qualitative research designs and inductive analysis, including research traditions, problems formulation in fieldwork, purposeful sampling, interactive data collection strategies, research reliability and validity. An interdisciplinary approach is used. Students conduct a small field study in their specialization.

**SEDP 711: Single Subject Research Methods (3 cr.)**
This course provides an overview of strategies for designing and conducting single subject studies that are relevant to education, special education, psychology, and other related fields of inquiry. This course is designed as an initial course in single research design. Factors that determine when and under what circumstances it is appropriate to employ a single subject paradigm are explored. The methodologies that are discussed are not specific to any disability condition or age level; rather a general set of methods are described for conducting and interpreting research where subjects serve as their own control. Issues surrounding the analysis of single subject studies and the generalizability of results obtained from multiple observations of single cases are discussed.

**SEDP 651: Proseminar (3 cr.)**
This seminar provides an introduction to the department, to research in special education, to the paradigms and methods of research, to the role of scholar/researcher, and to evidence-based practice. The course is designed to provide a foundation for the course work, independent scholarship, and research that students will undertake in the process of completing the doctoral degree. Students will engage in learning a variety of research designs relevant to special education, and conduct a targeted evidence-based practice paper that focuses on study design, study quality, and the primary components of internal and external validity.

**SEDP 705: Seminar on Disability Policy (3 cr.)**
This seminar provides an overview of policy development at the national and state levels including issues that affect disability policy and program management. Topics will focus on understanding policies in the areas of employment, education, health care, community living and finances. In particular, students will focus on current policy reform efforts in employment, education and health care. Class members will be required to contribute constructively to class discussion, research the key issues surrounding the policy reform efforts in their assigned area, and present their findings and analyses to the class.

**SEDP 706: Personnel Development in Special Education (3 cr.)**
This course provides doctoral students with an understanding of the key issues in personnel development in special education, as well as conceptual frameworks for teacher development.

**SEDP 707: Critical Issues in Special Education (3 cr.)**
This seminar provides doctoral students with an opportunity to explore, analyze, discuss, and write about a wide range of critical and/or controversial issues and trends in the field of Special Education within the broader context of education, applied psychology, contemporary society, and historical trends.
SEDP 708: Grant Writing in Special Education and Other Social Sciences (3 cr.).
This course examines conceptual, empirical, and practical issues in the preparation of grant proposals and in the conduct of interdisciplinary research in the social sciences that focuses on education and related issues in youth development, with a specific emphasis on youth with disabilities; develops students’ practical skills in: establishing interdisciplinary research teams; interdisciplinary research design and grant proposal development; matching research questions to funding agencies and their priorities; working with community agencies and relevant stakeholders to secure their involvement in the research process; writing research or training grant proposals.

SEDP 709: Literature Reviews in Special Education and Other Social Sciences (3 cr.).
This course provides in-depth, advanced instruction in the conducting of systematic literature reviews; instruction in how to create and refine a research question; instruction in defining and refining search terms; instruction in critically analyzing identified literature; and instruction in the writing and structure of a literature review.

SEDP 899: Dissertation Research.
Students who have passed their comprehensive exam and are actively engaged in their dissertation research should enroll in SEDP 899. Students work with their dissertation committee chair on the various components of proposing and conducting the study, with guidance from the other members of their dissertation committee. At a minimum, students should meet with their full committee to provide them with an update on their progress at least once per semester. This is particularly important for those who are not holding a formal prospectus hearing and/or final defense meeting during that semester. In addition, students who are enrolled in dissertation credits are encouraged to attend department and/or School of Education meetings, colloquia, and/or research support group meetings to minimize isolation from the program. See the Graduate School and Ph.D. in Education program policies for additional information about the requirements for the dissertation and roles and responsibilities for committee members.

Electives

Students will need to take at least 12 credits of electives, including a minimum of 6 credits which are a research elective. A research elective is required of all students and should be chosen based on proposed methodology needed to complete the dissertation study. In addition, all students are required to take at least one 3 credit course outside of the School of Education. This course should help provide a broader perspective of the influences on educational policy and research beyond the field of education. A research elective course taken outside of the School of Education could meet both of these requirements.

In addition to these elective requirements, a student's advisory committee may recommend and/or require additional coursework to help a student meet their individual career goals. There are a number of possible electives, many of which are listed on the Ph.D. in Education program
Blackboard site. This is not an exhaustive list as new courses are added each year. Students should consult with their advisor and advisory committee to help make decisions about coursework.

This is a three-year, 59 credit-hour program for full-time students that begins in the Fall semester and will end in the summer of the third year for those students who move through their dissertation study in a focused manner. Students will participate in three internships that provide an opportunity for them to work with department faculty on research, teaching, and policy/administration work designed to provide an opportunity for them to demonstrate competencies necessary for work as university faculty. The proposed program of study for the Ph.D. in Special Education is tabled below (see Appendix C for both part-time and full-time course sequences):

**Typical Course Sequence**

Doctoral students enroll in either a full-time or part-time basis, following the Graduate
School (http://bulletin.vcu.edu/graduate/) and School of Education (https://soe.vcu.edu/academics/doctoral-programs/) guidelines for continual enrollment. Typically full-time students enroll in 9 credits in the Fall and Spring semesters and 3 credits in the summer while part-time students enroll in 6 credits in the Fall and Spring semesters and 3 credits in the summer. There is some flexibility for part-time students, but students are advised to discuss any deviation from the prescribed sequence, as courses are offered typically only once per academic year. The recommended course sequences for full- and part-time students in both programs are outlined in Appendix D.

**Doctoral Advisory Committee**

After being admitted to the doctoral program, an advisor will be assigned to help students plan the first semester of courses, assist in obtaining financial assistance (if applicable), and begin the process of choosing a doctoral advisory committee. This advisory committee should be formed as soon as possible after the student has begun doctoral work and in general no later than the end of the second semester of equivalent full-time study, prior to the First Year Review process.

**Advisory Committee Membership**

The advisory committee for a candidate for the doctoral degree shall consist of no fewer than three members selected from the graduate faculty. At least two members, including the chairperson, will be from the Department of Counseling and Special Education. A co-chairperson may also be appointed if appropriate.

**Selection of Advisor and Committee Members**

1. An interim advisor will be assigned to all incoming doctoral students. This temporary assignment enables students to register for their first semester of study and to learn the procedures that will lead to the completion of their Ph.D. program. This temporary advisor is chosen as the faculty member with expertise that is in line with the research goals of the incoming student as described in the personal statement of the application and/or to provide balance in advising across faculty members. In most cases, that temporary advisor will remain as the student's advisor and chair of the advisory committee. However, there may be instances where a change may need to be made and in those instances, it should occur as quickly as possible so that the other members of the committee can be identified prior to the First Year Review/Qualifying Exam. Together, the student and advisor should consider a number of factors when developing a doctoral supervisory committee, including students’:
   (a) program emphasis with respect to the area of interest chosen (e.g., high or low incidence disabilities, early childhood, transition)
   (b) long-range interests, objectives, and goals
   (c) specific research interests

2. Once a doctoral advisor has been chosen, students in conjunction with their advisor, will:
(a) develop their proposed course of study
(b) identify and request appropriate faculty to serve as advisory committee members

Duties & Responsibilities

Duties of the advisory committee follow:
(a) To inform the student of all regulations governing the degree sought. **It should be noted, however, that this does not absolve the student from the responsibility of informing themselves concerning these regulations.**
(b) To meet during the First Year Review meeting to review the qualifications of the student, administer the Qualifying Exam, and other First Year Review materials to develop a Final Program of study.
(c) To provide ongoing support and consultation (as needed) to assist the student in completing program requirements and extra-curricular activities.
(d) To guide the student to conduct the comprehensive examination.
(e) To meet to discuss and approve the proposed dissertation project and the plans for carrying it out.
(f) To assist with identifying the membership of the student's dissertation committee (which may include members who were also part of the Advisory Committee). Once the dissertation committee is formed and approved through the Graduate Studies Office, the dissertation committee serves as the Advisory Committee.
(g) To conduct the annual review process.

The Program of Study Form can be found in Appendix F.

First Year Review / Qualifying Exam

The First Year Review of doctoral students includes the Qualifying Exam, which is designed to assess the student’s strengths, motivation, professionalism, and potential for achieving an in-depth knowledge of special education issues and a high level of competence in professional writing and speaking. For the Qualifying Exam the student should submit to their Advisory Committee the following documents at least two weeks prior to the meeting date:
1. A manuscript, in APA format, describing a disability/education related topic, at least 10 pages. This manuscript can be from a class the student has taken in the first year, with the appropriate edits, updates, and responses to instructor’s comments included.
2. An updated CV.
3. An updated statement of purpose.
4. Faculty evaluations of student performance in coursework.
5. Graduate assistantship evaluation (as applicable).

At the First Year Review (after the completion of 18 credits) the student will provide a brief presentation on their development in the program to this point as well as plans for the next year. The goal of this review is to assist students in making wise career decisions and to recommend specific courses or experiences, if any, that the student should undertake if they continue in our
special education doctoral program. In addition, at the First Year Review the student, in consultation with their advisory committee, may request a change in advisor to better reflect their substantive interests as they move forward in the program. The Advisory Committee will discuss student progress in the program (including any remediation or action needed based on course grades and/or qualifying exam results). Following the meeting the advisor should complete the post-qualifying exam form: [https://docs.google.com/document/d/1G1WgkzAojGzp5AcF-0yDvwVFUlykas4S/edit?usp=sharing&ouid=108751371950690154747&rtpof=true&sd=true](https://docs.google.com/document/d/1G1WgkzAojGzp5AcF-0yDvwVFUlykas4S/edit?usp=sharing&ouid=108751371950690154747&rtpof=true&sd=true)

See Appendix A for procedures.

**Comprehensive Examination: Ph.D. in Special Education**

The Advisory Committee is responsible for determining the readiness of a student to be admitted into candidacy for the doctoral degree. In making this judgment, the committee considers a student’s readiness to conduct research independently, ability to analyze research critically, mastery of the literature in major and minor areas, ability to integrate information, and clarity of written and oral expression. Successful completion of the comprehensive examination is required prior to decisions about candidacy.

The comprehensive examination has three parts: (1) a major area paper, (2) a portfolio of competencies, and (3) an oral examination. Students demonstrate in-depth understanding of a research topic in the major area paper and mastery of content related to their area of expertise across multiple competencies in the portfolio assessment. The oral examination includes a presentation of the major area paper and covers information from the portfolio as well as any other information the doctoral advisory committee members identify as applicable to the student’s studies.

Students need to pass all three components of the comprehensive examination, successfully defend their prospectus, and complete CITI training prior to advancement to candidacy. The advancement to candidacy form is completed after the prospectus defense.

In conducting the comprehensive examination, the Advisory Committee shall adhere to the Graduate School policy.

(1) **Major Area Paper**

For the major area paper, doctoral students conduct a substantive, integrative review of the literature in a specific content area related to the education of students with disabilities. The paper topic is determined by the student and chair in consultation with the doctoral advisory committee. The paper shall be of manuscript length (typically 25-30 pages) in APA style, be suitable for submission for publication in one of the journals of the field, and satisfy the chair and Advisory Committee that the student has the analytic skills necessary to conduct dissertation research. Students must (a) demonstrate the ability to create a conceptual framework and to organize the paper in a way that convinces the reader that researching the topic is critical to the field of special education and disability policy; (b) conduct an extensive, critical review of the literature; and (c) identify implications for future research and/or practice.
Students complete the major area paper as the culminating assignment in SEDP 709, with support from their committee and the instructor of SEDP 709. During the semester of SEDP 709, students are required to meet with their Advisory Committee as a group a minimum of one time and are required during that semester to meet with their advisor at least two other times. Students must complete their major area paper during that semester or have a valid reason for receiving an incomplete grade for the course. Incomplete grades must be submitted with a plan for completion of required work (to program coordinator) and according to graduate school rules, must be completed in the subsequent semester. Students must complete their major area paper defense (i.e., Comprehensive Exam) by the end of the semester following the completion of their major area paper.

Although doctoral students receive guidance from their chair and committee members in selecting a topic, organizing the paper, and revising the paper, they also function independently, as the major area paper is a key determinant of their readiness to design and implement dissertation research.

The major area paper shall be evaluated by the Advisory Committee members, the chair, and, at the chair’s discretion, faculty reviewers not serving on the committee. The SEDP Writing Competencies Rubric (used throughout the program to provide feedback on formal writing assignments; see Appendix C) will be used for evaluating the paper, and the chair shall communicate the evaluation criteria to the student. The rubric includes criteria commonly used in the review process for most educational journals (e.g., significance of the topic, inclusion of key research, depth of coverage, integration of ideas, appropriateness of conclusions, and written composition). The chair will determine (with the student) when the major area paper is ready for review by the doctoral advisory committee, but no later than the end of the semester after the student enrolls in and completes SEDP 709. Once the major area paper is ready from committee review, the student will provide a copy of the paper to all committee members (in addition to the portfolio, see below). The committee members will have no fewer than 15 working days to evaluate the major area paper and portfolio components. Scoring rubrics of the student’s major area paper must be submitted to the committee chairperson. The doctoral advisory committee must determine that the major area paper is acceptable (based on the rubric) before the student will be given permission to schedule the oral portion (see below) of the examination.

(2) Portfolio Assessment

Throughout the program students will collect a variety of products representing a number of competencies (see Portfolio Components form). The portfolio will provide documentation of each of these competency areas, and the student will use the Portfolio Components form to document successful completion of competencies (see Evaluation column) via faculty member signatures. In addition, when the student submits their major area paper to their committee, they will also submit the full portfolio with documentation for each competence area. This product may be submitted via hard or electronic copy, and it must be clearly organized in the order outlined on the Portfolio Components form. The student’s committee will review the Portfolio and their review will be considered in the overall comprehensive exam evaluation.

(3) Oral Examination
Once the major area paper and portfolio have been submitted to the committee, the student will schedule the oral defense, keeping in mind that committee members will have no fewer than 15 working days to evaluate the major area paper and portfolio components. At this defense the student shall prepare a presentation, not to exceed 30 minutes, that describes the findings of the major area paper and outlines areas for future research based upon the critical review of the literature. After the presentation committee members may ask questions of the student, including not only information from the major area paper but also information from components of the Portfolio, coursework or other areas pertinent to the student’s area of expertise. The oral examination, in sum, shall last no more than 90 minutes.

**Evaluation of the Comprehensive Examination**

Following the oral examination, the committee will meet without the student present, and the committee will make a decision on whether the student has achieved candidacy. The committee members will use the Comprehensive Exam Evaluation Form - Individual (see attached) to individually assess the student across three areas: Major Area Paper, Portfolio, and Oral Examination, as well as a comprehensive evaluation of the student’s competence in the areas of Policy, Personnel Development and Research. In addition, the Writing Rubric will be used to provide feedback to the student for the Major Area paper. Following the completion of the individual evaluations, the committee will reach consensus on a rating for each area in addition to the overall evaluation. The Chair will complete the Comprehensive Exam Evaluation Form- Committee (see attached), which will serve as a summary across all areas of the Comprehensive Exam. After the committee comes to a consensus on the decision, the student will be asked back into the room and the decision will be shared. Students who do not pass their comprehensive exam may have one additional attempt before being terminated from the program; this attempt will need to be scheduled within one semester of the initial oral defense.

*See Appendix B procedures.*

**Internships**

Students enrolled in the Ph.D. in Special Education program are required to take a series of three internships for credit as part of their programs of study. These internships provide an opportunity for students to spend concentrated time working on required portfolio tasks in the areas of research, teaching and policy/service. It does not replace completely the requirement that students also engage in other co-curricular activities with their advisors, advising committee members, and faculty across the university as it is unlikely that students will be able to accomplish all required portfolio tasks in an area during the internship semesters.

**Pre-requisite Coursework**

Students should complete required coursework before beginning a specific internship
experience. Students planning to take the policy internship should have taken SEDP 705 as a prerequisite; students planning to do the teaching internship should have completed SEDP 706 and have participated as a guest lecture in SEDP 501 or other similar introductory course in the M.Ed. Program, and students enrolling in the research internship should have passed the qualifying exam and taken SEDP 708 either as a prerequisite or concurrently.

**Coordination with Advisor and/or Advisory Committee**

Although students will be working on portfolio tasks/activities under the direction of a department faculty instructor, those specific activities should be chosen in consultation with their advisor and/or advisory committee in the semester prior to enrolling in the specific internship. An application process will be followed to help internship faculty plan for the coming semester, including finding appropriate placements and activities that best meet individual student needs for expanding skills and experiences that support their continued professional preparation.

**The Dissertation**

Your dissertation is a culminating and defining research experience that ideally serves as the basis of your post Ph.D. program of research. Dissertation planning starts early in your program and reflects your interests and knowledge of the research literature and the needs of the discipline. The doctoral candidate must present a dissertation showing the planning, conduct, and results of original research and/or scholarly creativity. The purpose of the dissertation is to encourage and ensure the development of broad intellectual capabilities and to demonstrate an intensive focus on a problem or research area. The dissertation itself should be an evident product of the candidate’s growth and attainment of the ability to identify significant problems/gaps in the existing literature; organize, analyze, and communicate scholarly results; identify implications for future research, policy and/or practice, and bring to bear on an area of scholarly or scientific interest a variety of research skills and scholarly or creative processes. The dissertation must show original accomplishment, but it should also demonstrate without doubt the candidate’s potential to make future contributions to knowledge and understanding.

The VCU Office of Graduate Studies requires that the dissertation be a unique, coherent scholarly work, not a collage of separate, distinct pieces. Its unity of theme and treatment may still accommodate several subtopics by demonstrating their relationships and interactions.

Within the Ph.D. in Special Education program, **students are permitted to choose from two dissertation formats, either a traditional, five-chapter format dissertation** (Introduction, Literature Review, Methods, Results, Discussion) **or a dissertation structured with an introductory and culminating chapter, with the literature review and/or dissertation study findings presented in at least three additional chapters that, individually, are formatted in journal article format and are suitable for submission for publication in peer-reviewed**
journals in the field. You should work with your advisor to determine which format best suits your research design and reporting needs (as well as your long-term career goals). It should be noted that the three-paper dissertation format can be more challenging and might not be necessary for a doctoral student who plans to work in administrative/practitioner roles or in some less research-focused positions in higher education. Your advisor can locate examples of both formats to share with you if need be, however since this is a new process for VCU, examples might not be completely relevant to your planned topic or the methodologies you choose to follow. More details about the two different formats are presented below. See the guidelines for the traditional dissertation format if that is your preference and it better meets your career goals.

Selecting a Dissertation Committee

After the student has been awarded Continuing Doctoral Status, and by the time the student has completed 27 credit hours in the program, the student should meet with his or her advisor to begin the process of selecting a dissertation committee. The committee must be selected and names submitted for approval to the Director of the Ph.D. in Education by the end of the semester in which the student completes SEDP 709. All members are expected to have an interest in and knowledge of the student's proposed dissertation topic. Dissertation committee members may be, but are not required to be, members of the student’s advisory committee.

Within the above stated time frame, the student and their advisor begin the process of selecting a dissertation chair. Dissertation committees must have a minimum of four members. Three of the members, including the chair, must be graduate faculty from the School of Education. The fourth member must be a Virginia Commonwealth University graduate faculty member from outside the School of Education. A fifth member may be added at the discretion of the dissertation chair and the student. This member must also be from outside the School of Education and may be from outside the University. There is no expectation that the advisor will chair the student's dissertation committee.

After the student and their advisor have agreed on the dissertation chair, the dissertation chair and the student develop a list of other proposed dissertation committee members. The student contacts those nominees to determine their interest and willingness to serve. If any person declines to serve, the student and the dissertation chair select a replacement. This procedure is followed until a committee has been selected.

No person may serve on a dissertation committee if such service would create the appearance of conflict of interest. For example, a student who teaches in a college or university may not have a faculty member in the same school or department serve on the committee; a student from an agency or commercial organization may not have their supervisor serve on the committee. A written request is then sent to the Director of the Ph.D. in Special Education for final approval of committee members. The Director of the Ph.D. in Special Education will review the credentials of proposed members and will approve the candidates submitted, or may,
at their discretion, reject candidates who appear to have a conflict of interest.

Normally, barring resignations, members of a dissertation committee continue to serve until the candidate's research is completed and approved. However, in rare cases it may be necessary to make adjustments in committee membership. If a dissertation committee member is unable to continue to serve, the Director of the Ph.D. in Special Education is notified and requests that the dissertation chair select a replacement. The chair and the candidate choose a replacement and submit the name to the Director of the Ph.D. in Special Education program. In such cases, the Director of the Ph.D. in Special Education program has responsibility for reconstituting the dissertation committee.

**Selecting A Dissertation Topic and Format**

After the dissertation committee has been established, the dissertation chair and the student, in consultation, agree on a suitable dissertation topic and dissertation format (i.e., traditional format or 3-paper format). The student then meets individually with the other members of the committee to discuss the dissertation topic, obtain their suggestions and, ultimately, their approval. When all have agreed that the proposed topic is a suitable one, and the student has successfully completed all course work and the comprehensive examination, the student proceeds to develop a prospectus.

**Traditional Dissertation**

**The Prospectus**

The Prospectus is a plan the candidate develops to serve as a guide in completing their dissertation research. It is expected that the plan should be concise, well-articulated, well written and represent the candidate's best thinking and inquiry on a researchable topic. The *American Psychological Association (APA) Manual 7th edition* is the style of choice for dissertations.

It is the candidate's responsibility to develop the prospectus. The candidate, however, is expected to consult regularly with the dissertation chair and with committee members. When the candidate keeps the members of the dissertation committee informed of progress in the development of the prospectus, later problems are usually minimized.

Since the prospectus is a detailed plan of the candidate's dissertation, it reflects the dissertation format. The body of the prospectus is composed of three major parts, roughly equivalent to the first three chapters of the final dissertation, as well as some other features typical of a major scholarly work. The relative length and depth of each section may vary somewhat, but it is expected that each section will be included in the prospectus.

The first part, titled **Introduction**, includes the statement of the problem and its significance, the rationale for the study, a summary of the literature review and methodology, and a listing of specific research questions. In essence, the **Introduction** should provide a brief overview and understanding of what will be studied, why it is of importance, and how it will be accomplished. The second part of the prospectus, called the **Review of Literature**, describes and
documents the theoretical, historical, experiential, and/or experimental background of the proposed study. The review should be carefully organized to clarify the various conceptual and interdisciplinary roots from which the proposed study has emerged and illuminate the way in which the study will expand upon, rather than duplicate, past knowledge. Thus, it includes a thorough review of the empirical literature relevant to the dissertation question(s), although it may not provide the exhaustive review of supportive and related areas that will be found in the final dissertation. In addition, this part usually includes a subsection listing the terms and definitions that are critical to the study. The third part, termed Methodology, presents the detailed procedures that will be followed in conducting the research and, therefore, is written in the future tense. Dependent upon the specific methodology to be employed in the study, such components as the population, instrumentation, procedures, research design, data analysis steps, and other information needed to understand the study should be included and described in detail. In most instances, the limitations of the study are also delineated in this part of the prospectus. Although the content of these first three parts has been carefully developed to provide both a clear overview of and detailed plan for conducting the dissertation study, placement of two specific components may vary. Depending upon the area of inquiry and the nature of the study, the definition of terms may be placed in the first or second part and the limitations and/or delimitations of the study may be located in the first or third part of the prospectus. In such situations, clear guidance should be sought from the doctoral Committee.

In addition to the three basic parts of the written prospectus, a Title Page and Table of Contents should precede the Introduction. A bibliography, which lists all sources cited, but no additional supporting references, follows the Methodology part of the prospectus. Appendices should also be used as appropriate, to include any documents, such as letters, permissions, data gathering instruments, or other exhibits that will be used in conducting the dissertation research.

**The Prospectus Review**

When, in the opinion of the dissertation chair, the prospectus is ready for critical review, a meeting of the dissertation committee is scheduled. A written request to schedule a date and time for a prospectus review is submitted by the chair and candidate to the dissertation committee. The Director of the Ph.D. in Special Education program, with the assistance of the Office of Doctoral Studies, schedules the prospectus meeting, which is two hours in length, publishes the candidate's name, date, place, time, title of the prospectus, and names of the chair and committee members. The candidate's family members are not invited to attend the review.

It is the candidate's responsibility to provide a completed copy of the prospectus for each member of the dissertation committee and to file one copy in the Office of Doctoral Studies, at least 14 calendar days prior to the prospectus meeting. The prospectus review will not be announced until the prospectus is filed in the Office of Doctoral Studies.

Upon completion of the prospectus review, the candidate is excused from the meeting room and the committee makes its decision. A minimum of three positive votes is required for approval. Following are procedural outcomes for the dissertation prospectus.
Approved
Approval by the committee indicates that the prospectus is in its final, approved form. The document adheres to appropriate APA standards, including reflecting high quality professional writing with little to no grammatical errors, and the research design is appropriate for the proposed study. Upon approval of the prospectus the student will enter candidacy and may begin the approved study, including appropriate human subjects protection procedures, if necessary.

Approved with minor revisions
Approval with minor revisions by the committee indicates that the prospectus is approved contingent upon minor revisions indicated by the committee. These revisions may include minor APA and grammatical edits and/or minor revisions to the research plan. Due to the limited revisions necessary to achieve approval of the prospectus, the committee may agree that the Dissertation Chair can ensure that the final document addresses identified revisions without the re-convening of the full committee. Revisions to the Chair are due within one month of the original meeting date and should be shared via a track-change version with all committee members.

Major revisions needed
Major revisions needed indicate that the committee feels the prospectus needs significant work prior to being approved. These revisions may include some combination of significant APA errors, grammatical and writing errors, or flaws in the research design. The student will have up to one semester from the date of the original meeting to make revisions to the prospectus, under the guidance of the Chair and the committee. Upon resubmission of the revised prospectus, the student should submit to all committee members (a) a letter outlining the responses to the revisions recommended by the committee, and (b) a track-change version of the revised prospectus that indicates revisions made. At this point a prospectus meeting may be scheduled.

Not approved
If the prospectus is not approved by the committee, the student will have one semester from the date of the original meeting to submit a new prospectus to the committee. If, after either (a) a new prospectus not being submitted within one semester of the original meeting date, or (b) a second not approved prospectus, the student will be dismissed from the program.

If the prospectus is approved, the dissertation committee signs the Prospectus Review Report and forwards it to the Office of Doctoral Studies. If the prospectus is approved with minor revisions, the dissertation committee may sign the Prospectus Review Report, noting the specific changes to be made, and the chair forwards it to the Office of Doctoral Studies. If the prospectus needs major revisions, the student will have up to one semester to make changes to the prospectus and schedule another prospectus defense. The student should submit a letter outlining the responses to the revisions and a track-change version of the prospectus indicating revisions. If the prospectus is not approved, the student will have one semester to submit a new prospectus and will have one more opportunity to achieve an approved prospectus.
Regardless of the decision, all members of the committee sign the **Prospectus Review Report** signifying the committee's action. It is the responsibility of the dissertation chair to communicate the decision to the candidate for implementing any changes requested by the committee. The approved **Prospectus Review Report** then becomes a part of the candidate's permanent file.

Students must submit the appropriate materials to the Virginia Commonwealth University Institutional Review Board (IRB) with the assistance of the dissertation chair and via the office of the Associate Dean for Academic Affairs. While the dissertation chair is the principal investigator for all dissertation research studies, it is the students’ responsibility to ensure that IRB approval has been obtained before beginning any data collection activities and that a copy of the approval letter has been submitted to the Office of Doctoral Studies. Students using secondary data must contact and receive formal approval from IRB before the use of any data. Students should consult with their chair in order to optimize the timing of IRB submissions (including amendments).

**The Traditional Dissertation Format**

Although the dissertation follows the format already utilized for the approved prospectus, minor revisions must be made as the prospectus parts are developed into dissertation chapters. Two additional major components and some new specific pages must also be prepared and included in the final dissertation. The three prospectus parts become the first three chapters of the dissertation and additional chapters titled "IV. Findings" and "V. Conclusions and Recommendations" complete the written record of the candidate's study.

For the dissertation, the **Introduction**, as presented in the prospectus, requires the addition of a brief summary of the findings and conclusions. Often the **Review of Literature** also has to be expanded to include greater information about areas that support or relate to the dissertation question under study. The part on **Methodology** in the prospectus must be revised from future to past tense. Any changes in the procedures or difficulties which developed in carrying out the methodology are also reported.

The quantitative and/or qualitative results of the study, where appropriate, are reported in the **Findings** chapter. In addition to data describing the actual population used in the research, both tables and explanatory clarification of the actual data collected in the course of the study are presented in the first section of the chapter. Narrative analysis of the data and any trends observed are discussed in a final section of the same chapter.

The **Conclusions, Limitations and Recommendations** chapter utilizes the data already reported and relates those findings to the specific research problem and questions delineated in the Introduction and each subsequent chapter. Therefore, the chapter must be carefully crafted to reflect the actual content of the preceding four chapters, as well as to provide logical extensions of that content. The recommendations, which are highly dependent upon the nature of the dissertation problem, attempt to put the dissertation research into practical terms. Thus, the recommendations that emerge, in part, form the basis for further research as well as implications
for practice and policy.

**Three-paper Dissertation**

The manuscript dissertation is one response to considering how the dissertation can better support students seeking research careers after graduation and encourage greater dissemination of research findings in education (Duke & Beck, 1999; Nehls & Watson, 2016). The manuscript-style dissertation is one type of dissertation format consisting of multiple papers in published or publishable form (Nehls & Watson, 2016); for the Ph.D. in Special Education, this format will include three separate papers.

**Goals**

1. To support students’ professional goals in research-intensive careers after completing the Ph.D. degree by devoting more time for students to develop publishable manuscripts as part of the dissertation process rather than waiting until post-graduation.

2. To more rapidly and widely disseminate dissertation findings so it becomes part of the published research literature in a more timely way.

3. To enhance and encourage wider dissemination of research by students while still in their programs and/or as early career professionals post-graduation.

**Guidelines**

Deadlines and overarching procedures should be consistent with program, college and university guidelines, catalog, and deadlines. However, there are specific guidelines for the manuscript dissertation to support both the student and the dissertation committee. As a result, there are additional and/or slightly different requirements for planning and executing a manuscript-style dissertation.

**Dissertation Proposal Meetings**

All students in the PhD in Special Education program are required to have a proposal defense meeting of the student and the committee to approve the dissertation proposal. However, given the requirements of the manuscript-style dissertation, an added planning meeting is suggested to discuss and outline the plan for the dissertation study, including what papers will be included as part of the final document as well as the overall structure of the project. It is suggested that the Major Area Paper (Systematic Literature Review) will be included as one of the three papers comprising the dissertation, and should be submitted to an appropriate journal.
for review prior to the final dissertation defense. Upon completion of the planning meeting, the student should submit the dissertation committee form and a summary of the planning meeting discussion to the School of Education’s Office of Graduate Studies, the PhD of Special Education’s Program Coordinator and members of the dissertation committee.

The second proposal meeting should include an oral defense of the full, written proposal including literature review, research questions and methodology, timeline and proposed papers for inclusion. The proposal should address authorship of papers (which can change based on actual contributions as they are written). The student must be the lead or sole author on the research papers, including committee members as appropriate given their role in the conceptualization of and/or production of the final papers. Targeted journals for each paper should be identified with the journal(s) author information included in an appendix so that committee members can have easy access to that information to determine the appropriateness of the proposed paper given the journals’ audience, types of manuscripts accepted, and relationship to the topic. In the case of a collaborative project that may be included in the dissertation, the student’s role in the research must be clearly outlined and described. It is expected that with collaborative projects, students should be responsible for at least 65% of the authorship of the manuscript to be considered acceptable.

The three central papers should be of a quality, length, and focus consistent with publication in peer-reviewed journals in the discipline or related disciplines. Papers do not need to have been accepted for publication to pass the dissertation, but the papers should be submission-ready, and the systematic literature review should have been submitted to an appropriate journal and at a minimum be under review. The types of manuscripts that are acceptable to be included in the dissertation should be guided by those acceptable by the targeted journals and the needs of the field. These can include empirical quantitative research studies, secondary analyses of existing databases, single subject research studies, practitioner pieces, policy reviews, additional literature reviews, case studies, various qualitative studies, and in some cases, program descriptions.

After passing the comprehensive exam (Major Area paper and final portfolio review), and in a separate meeting after the initial planning meeting, you must present a written dissertation proposal or prospectus that is discussed and approved by your dissertation committee, typically but not necessarily the same members as your Doctoral Advisory Committee. Membership should include your dissertation chair, a methodologist, another Special Education faculty member who is a content expert (or a content expert from outside the program faculty if approved by your dissertation chair), and an outside member (generally someone at VCU who is outside Special Education and preferably outside the School of Education), though membership should be discussed with your chair prior to reaching out to invite other faculty to
serve on your committee. Generally, a discussion with your doctoral advisory committee about possible committee members is part of the comprehensive examination meeting, after the presentation of the Major Area Paper, the possible research questions that could lead into the dissertation, and a general timeline for the dissertation study. At this time, the student’s interest in following a 3-paper dissertation format will be discussed. All members of the dissertation committee (for either format) must have at least Affiliate Graduate Faculty Status.

The dissertation proposal meeting is not a formal examination meeting and the purpose is to come to consensus on a student’s dissertation research. Students are required to meet with the dissertation chair prior to the actual proposal meeting to obtain input and feedback in preparation for the meeting, and to receive approval to share the proposal with committee members (must be at least 2 weeks in advance). The dissertation proposal meeting is not a public meeting, although open to students and faculty within the School of Education. Outside guests are not generally invited, although there can be some exceptions if approved by the dissertation chair. Following approval of the proposal, you may begin the formal dissertation work, including submitting an Institutional Review Board proposal. Upon completion of your dissertation and its initial approval by your advisor and dissertation committee, you may schedule the final oral examination (a.k.a. the oral dissertation defense) conducted by the dissertation committee. See Table 1 for an overview of the timeline/milestones.

Dissertation Hours Enrollment

The VCU Special Education doctoral program requires that students have a minimum of 9 dissertation hours, but the majority of students will accumulate more credits than this, particularly full-time students who need to enroll in a minimum of 9 hours during the fall and spring semesters and 3 credits in the summer. Doctoral students are required, after passing the comprehensive oral examination, to be continuously enrolled in one or more hours of dissertation credits (SEDP 899) that both moves the student towards degree completion and reflects, as accurately as possible, the candidate’s demands on faculty time and university facilities. During this time, until all requirements for the degree are completed (including the filing of the dissertation) or until 9 post-comprehensive hours have been completed (whichever comes first), the candidate must enroll for a minimum of 3 hours in the fall and spring semesters (except for those who are receiving a graduate assistantship as a full-time student). The following circumstances would require summer enrollment:

• If you are a full-time, 12-month Graduate Assistant, the student must be enrolled in a minimum of 9 credit hours in the Fall and Spring semester and a minimum of 3 credit hours in the summer.

• If you are funded through a project that requires registration in the summer. Please check with your advisor on this issue.
• International students are typically required to enroll continuously, including summer hours, to fulfill visa requirements. (Contact the VCU Global Education Office if you have questions regarding continuous enrollment requirements for your VISA status).

• If you are planning to use any university resources, including working directly with faculty on the dissertation), you must enroll in the appropriate number of summer hours. In addition, if you are planning to have the Prospectus or Final Dissertation meetings during the summer, then a minimum of 1 credit of SEDP 899 is required for the summer.

**Dissertation Defense Meeting**

You and your advisor (dissertation chairperson) will work to find a mutually-agreeable date and time among your committee for the dissertation defense. You should allow 2 hours for the defense meeting. This meeting should be scheduled through the Graduate Studies Office with Kelly Winn to secure a room and so that she can send out a formal announcement to the SOE community. Students turn in a copy of their final dissertation to her office, and stop in her office prior to the meeting to pick up paperwork that needs to be completed during the meeting.

**Dissertation Content**

The 3-paper dissertation’s final version includes the front and back “cover” chapters that introduce and summarize the multiple papers within the dissertation. These chapters should describe the program of research the manuscripts support, the literature review that support the study, and in the final chapter, be a discussion of how these findings tie together and their combined implications for further research, practice, and policy. (Individual papers will include a discussion section that describes the implications for the separate studies).

The dissertation also includes the manuscripts themselves. In the event that copyright related to a published paper would prevent a full paper from inclusion in the dissertation, then an early published version of the manuscript (ie Online First). If that is not available, the candidate will work with his or her dissertation chair and the journal publisher to find an acceptable option. Students should attend to the copyright policies of intended journals as they are preparing manuscripts. The student and the dissertation committee should also include appropriate use of the university’s embargo policy for dissertations where appropriate.

You must have the ‘defense ready’ version of your dissertation (approved by your advisor/dissertation chair) sent to every committee member no later than two weeks before your scheduled defense. Send the dissertation in word format but ask if any committee member wants a print copy. If so, it is your responsibility to print and get that copy to the committee member within the 2-week timeline.
During the Dissertation Defense Meeting

Completion of the dissertation is the final academic phase of a doctoral program, culminating in the final oral examination and defense of the dissertation. In all but the rarest cases, tentative approval of the written dissertation is followed promptly by the final oral examination. You have ten days from the final oral defense to complete any required edits and to upload the finished dissertation to Scholar Compass.

The committee for the dissertation defense meeting must consist of at least four members as detailed previously. In most cases, the dissertation defense is conducted in person with all members of the committee in attendance. As with the prospectus hearing, faculty and doctoral students from the VCU School of Education are welcome. Others not affiliated with the University are not typically invited to attend.

The oral defense of a 3-paper dissertation should include a short summary of the rationale and background literature that guided the overarching research questions and methodology. The majority of the presentation should highlight the specifics for each paper before moving on to a discussion of the implications of the three studies in terms of future research, practice, and policy.

Steps of the 3-paper dissertation process

1. **Comprehensive exam**: Indicate interest in this option for dissertation format and identify possible research questions that come from the Major Area Paper. Discussion about potential timeline and dissertation committee membership occurs.

2. **Discussion with Dissertation Chair**: Focus research questions, methodology (or methodologies), possible three manuscript options, and finalize dissertation committee membership requests. Develop 1-2 page abstract of proposal to share with possible committee members.

3. **Identify Dissertation Committee Members**: Meet with potential dissertation committee members (in person or virtually) to discuss topic, potential methodology/methodologies, potential targeted outlets, possible role on committee.

4. **Finalize committee membership**: Once members have accepted their invitations, complete the Dissertation Committee Agreement Form and submit to the VCU School of Education’s Office of Graduate Studies (Kelly Winn). All committee members must
have VCU Graduate Faculty Status, or an application for Affiliate Graduate Faculty Status must be submitted and approved by the Dean of the VCU Graduate School.

5. **Hold preliminary meeting with Dissertation Committee Members:** Once members have been approved, a planning meeting will be held with all members to discuss the scope of the dissertation, and the student’s plan for the 3 papers. Students should consult with their chair and committee members to determine timing of IRB submission.

6. **Prospectus Meeting:** This is a formal oral defense of the written proposal that includes the following components: Introduction, literature review, research questions, research methods, timeline, and proposed papers for inclusion. An appendix will be provided with author guidelines for the proposed targeted journals. The proposal should be submitted to the committee at least 2 weeks prior to the meeting that should be scheduled with Kelly Winn’s office.

7. **IRB proposals:** Students should consult with their chair and committee to determine timing of IRB submission. If conducting research in schools or community organizations, check with them about their additional procedures (if any). Sometimes they will want to have you go through their process before submitting to VCU. Others will want to see VCU approval before they will consider reviewing it. Be aware that for these types of intervention studies, school divisions may only review proposals once a month. Find out their timelines early so you don’t have unnecessary delays.

8. **Prospectus Edits:** If your committee requires any edits to your full prospectus document, be sure to work on those in a timely manner and submit first to your chair and then when approved, to the other committee members (unless your committee requires a different timeline/procedure).

9. **Conduct the research & Analyze Data:** Recruit participants and follow the steps of the methodology approved by your committee. If you have any unforeseen challenges, talk with your chair and/or methodologist as soon as possible. This can happen when conducting applied research, so be ready to problem-solve solutions and document any of these changes that you have had to make along the way.

10. **Prepare the final dissertation:** This will include the following components:

    a. **Introduction:** This Chapter will Introduce the topic, the need for the research, and summarize the multiple papers that are within the dissertation. It will not repeat the literature review, but will summarize/synthesize it as well as
provide any additional background from policy and/or practice that provide the context for the reader/committee.

b. Paper 1: Follows the formatting requirements of the targeted journal

c. Paper 2: Follows the formatting requirements of the targeted journal

d. Paper 3: Follows the formatting requirements of the targeted journal.

e. Summary Chapter: This chapter serves as the Discussion and Implications Section of your dissertation. That is, what do the results of these three papers tell us? How do they tie back to the literature review? And what are the implications for practice, future research and policy?

F. Appendices: This section should include any supplementary information that should be shared so that the committee gains a better understanding of your research. This can include interview questions, data collection instruments, examples of data analysis, etc. Candidates should talk with their dissertation chair and/or methodologist for their recommendations.

11. Submit final dissertation to the Graduate School

**The Dissertation Defense**

Upon completion of the dissertation research, the dissertation chair schedules a dissertation defense by submitting a written request to the Director of the Ph.D. in Education program along with a list of acceptable dates from the University calendar. This request must be submitted at least 14 calendar days prior to the first acceptable date listed on the request. The Director of the Ph.D. in Special Education program, with the Office of Doctoral Studies, schedules the two-hour defense, publishes the candidate's name, date, place, time, title of dissertation, and names of chair and committee members. The candidate's family members are not invited to attend this meeting. The final dates for the oral defense are the third Friday in April, the fourth Friday in July, and the first Friday in December for May, August, and December graduation respectively.

It is the candidate's responsibility to provide a completed copy of the dissertation for each member of the dissertation committee and to file one copy in the Office of Doctoral Studies, at least 14 calendar days prior to the date of the scheduled defense. The dissertation defense will not be announced until the dissertation is filed in the Office of Doctoral Studies and reviewed by the Director of the Ph.D. in Special Education program.

**Approval of the Dissertation**
Following the oral examination of the candidate by members of the dissertation committee, the candidate is excused from the meeting room and the committee makes its decision. The committee may decide to approve the dissertation as written, or request the candidate to make specific major or minor changes. A minimum of three positive votes is required for approval. The committee members signify their approval of the dissertation by signing the Dissertation Approval Certificate and the Dissertation Oral Report form. It is the candidate's responsibility to meet any further University requirements for filing the approved dissertation.

If major changes (defined as conceptual, factual, or interpretive changes) are needed, a second dissertation defense is scheduled, at which time the dissertation committee reviews and acts on the revisions. If the recommended changes are minor ones, (spelling, typographical or syntactical), the committee may empower the dissertation chair to act on its behalf in supervising the corrections. In this case, the candidate is expected to make the required changes within a week (5 working days) and resubmit the corrected copy to the dissertation chair for approval. The final approved dissertation must be submitted electronically by following the university graduate school dissertation uploading guidelines within two weeks (10 working days) after the defense date.

Responsibilities

The Candidate

The dissertation is the candidate's research, but it is also the candidate's responsibility to seek out and respond to guidance and feedback from the dissertation chair and each committee member. At the same time, the candidate should recognize that faculty workloads vary during the year, so that contacting a committee member, scheduling an appointment, critiquing a written draft, and similar activities may unavoidably require extra time in some instances. Maintaining contact, however, will facilitate the good communication that helps make the dissertation development process a rewarding experience for all. Early in the dissertation process, the student should meet with the chair to establish a realistic timeline for completing the dissertation.

Responsibilities of the Candidate

1. Selects a dissertation chair, with guidance from their advisor.
2. Nominates committee members with guidance from the dissertation chair.
3. Establishes attainable research goals, with the approval of the dissertation chair and committee members.
4. Prepares formal written materials in an accurate and scholarly form by:
   b) assuring that prior to submission for formal review or defense, the form, grammar, and editing of the written prospectus and dissertation are accurate.
5. Meets required deadlines for submission of written materials by:
   a) distributing copies of the completed prospectus to the dissertation chair, each
committee member, and the Office of Doctoral Studies, at least 14 calendar days prior to the date of the prospectus review.

b) distributing copies of the completed dissertation to the dissertation chair, each committee member, and the Office of Doctoral Studies, at least 14 calendar days prior to the date of the dissertation defense.

6. Meets with the committee each semester to provide an update on progress (see Appendix D for Form).

7. Presents a written outline or summary of the proposed research for review and approval to each of the committee members. In either format, the candidate should be sure to delineate clearly the proposed problem statement, research questions, and methodology.

8. Develops a formal written prospectus that includes an introduction, a review of literature that includes all major studies relevant to the specific research questions, and the methodology to be used.

9. Receives formal committee approval of the prospectus.

10. Submits application to the Institutional Review Board before beginning data collection.

11. Understands that when the prospectus is approved by the dissertation committee at the prospectus review, it becomes an agreed upon plan between the candidate and committee. Any changes in the approved prospectus must be discussed with and approved in writing by the committee.

12. Consults with and is guided by the dissertation chair and committee members throughout the research process. Although the specific interaction between the candidate and committee may vary, the candidate is expected to make appointments and, when requested, submit written drafts at least 7 calendar days prior to meeting with the dissertation chair or committee members.

13. Understands and is prepared to defend the research methods and data analyses used in the dissertation.

14. Picks up from the Office of Doctoral Studies the folder of dissertation approval signature documents and brings it to the dissertation defense.

15. Assumes responsibility with the dissertation chair for the final proofreading of the dissertation.

16. Contacts the Office of Doctoral Studies to complete exit forms and submits the final approved dissertation electronically by following the university graduate school dissertation uploading guideline.

The Dissertation Chair

Serving as a dissertation chair constitutes a major responsibility to the candidate, the School of Education, and the Ph.D. Program. For the dissertation chair, the dissertation process requires extended involvement with both the candidate and committee members. It is time-consuming and, at times, demanding. At the same time it provides an intellectual challenge unlike any other University responsibility. Through successful guidance of a completed dissertation, the chair not only contributes to the expansion of knowledge in a given field, but also becomes an integral part of that contribution as the dissertation becomes a basis for future research.

Responsibilities of the Dissertation Chair
1. Guides the candidate in:
   a) developing a scholarly, researchable question.
   b) preparing the written outline or summary of the problem statement, research question, and methodology.
   c) selecting and utilizing instrumentation and statistical analyses congruent with the methodology and research design.
2. Establishes times when they will be available to guide the candidate with prospectus and dissertation drafts.
3. Establishes, with the candidate, attainable research goals and a reasonable time frame for completing the steps in the dissertation process.
4. Clarifies for the candidate and committee members the role of the candidate, chair, vice-chair (where appropriate), and committee; and suggests ways in which each can contribute most effectively to the dissertation development process.
5. Advises the candidate when materials are at an appropriate level of completeness to share with committee members, as well as when to communicate progress or problems.
6. Assists the candidate in preparing the application for the VCU Institutional Review Board. For IRB purposes, the chair is the principal investigator for the research and is required to complete one of the basic courses in the collaborative IRB training initiative (CITI) human subjects protection education.
7. Guides the candidate in developing content and format, as well as in using appropriate grammar and style; and assures that the final document is without error and suitable for publication.
8. Supervises the preparation of and approves both the prospectus and the dissertation prior to the formal review, and the defense.
9. Schedules the candidate's prospectus review and dissertation defense through the Office of Doctoral Studies.
10. Maintains a climate that facilitates constructive discussion during the prospectus review.
11. Submits a grade of Satisfactory, Unsatisfactory, or Fail for dissertation credit to the Director of Ph.D. in Special Education program during each semester in which the candidate is enrolled in EDUS 899: Dissertation Research.
12. Maintains a climate conducive to a fair review of the candidate's dissertation research during the dissertation defense.

**Dissertation Committee Members**

The expertise of each committee member is essential to the development of the candidate's dissertation research, and as such, will be reflected in the quality of the final product. The contributions and support of each committee member helps assure that the candidate will complete a quality dissertation.

**Responsibilities of Committee Members**

1. Assist the candidate by:
   a) critiquing all written materials submitted by the candidate.
b) conferring in the selection of instrumentation and statistical analyses congruent with the research design.
c) providing content, methodological, and/or statistical expertise related to the research problem under study.

2. Presents concerns and suggestions to the dissertation chair and candidate during the prospectus development process.
3. Recommends additional committee meetings to the dissertation chair when needed.
4. Participates in the prospectus review and dissertation defense.

DOCTORAL PROGRAM CHECKLIST

There are many points to follow from admission to graduation. Use this checklist as a basic guide to help you through the process. In addition, you must use the information in your graduate catalog http://www.pubapps.vcu.edu/bulletins/graduate/ and this document to keep you informed as to the requirements needed at each step in the doctoral degree adventure.

_____  1. Admission to the program
_____  2. Selection of a Doctoral Advisory Committee
_____  3. Qualifying Exam and First Year Review
_____  4. Program of Studies Approval
_____  5. Completion of Coursework
_____  6. Completion of Internships
_____  7. Completion of Portfolio tasks
_____  8. Comprehensive Examination
_____  9. Dissertation committee & proposal approval
_____  10. Dissertation defense & Graduation
Appendix A

Department of Counseling and Special Education

Ph.D. in Special Education

First Year Review Process

The first year review process provides multiple points of evaluation for feedback. They include the qualifying exam, academic performance evaluation, graduate assistantship and/or internship performance evaluation, evaluation of a writing sample, and a first-year committee meeting. At the end of the process, the committee a) approves the student moving forward in completing the coursework; b) recommends remediation in one or more areas; or c) recommends dismissal from the program.

Qualifying Exam

Upon completion of the first 12-18 hours of required coursework, the doctoral student will schedule a meeting of their Advisory Committee. The student will submit to their Advisory Committee the following documents at least two weeks prior to the meeting data:

1. A manuscript, in APA format, describing a disability/education related topic, exceeding 10 pages. This manuscript can be from a class the student has taken in the first year.
2. An updated CV.
3. An updated statement of purpose.
4. Faculty evaluations of student performance in coursework.
5. Graduate assistantship evaluation (as appropriate).

At the First Year Review the student will provide a brief presentation on their development in the program to this point as well as plans for the next year. The Advisory Committee will discuss student progress in the program (including any remediation or action needed based on course grades and/or qualifying exam results).

Academic Performance Evaluation

The Office of Doctoral Studies will send the appropriate form to students with a suggestion that they request an academic performance evaluation from three instructors. The SEDP requires that all SEDP courses be evaluated, and that all instructors, regardless of what department originates the course, be invited to evaluate the student. Academic performance is measured across such dimensions as in-class performance, content mastery, scholarship (knowledge from literature, writing, oral communication), commitment, etc. A sample of the evaluation form is in Appendix A.

Graduate Assistantship and/or Internship Evaluation
Students who have a graduate teaching or research assistantship (as well as students who complete an internship) are required to submit a completed evaluation (see form below) to their advisory committee during annual review meetings. This form should be completed by the assistantship or internship supervisor and returned to the advisor. The student should provide the supervisor with an envelope that may be sealed to allow for an appropriate evaluation.

**Evaluation of a Writing Sample**

Students must provide the committee with a sample of their writing, specifically, a paper or project that was submitted for a grade during the first year; the paper must utilize APA style complete with citations and a reference list. A writing rubric is used to evaluate the sample and to serve as a guide for feedback to the student. The purpose of providing a substantive writing sample is to inform the faculty of the potential need for support. By identifying specific areas in need of improvement, faculty advisors can provide early and targeted strategies to ensure optimal writing during the prospectus and dissertation phases of the program.

In addition to a course-related writing sample, students are requested to update their personal statements from their application packet. This ensures that the committee is up to date with the direction the student intends to take for the dissertation.

**First-year Committee Meeting**

The first-year review process culminates in a meeting of a student and three members of the SEDP faculty, selected by the student and the advisor, and who typically have professional interests in common with the doctoral student. Each committee member will have had the opportunity to review the exam results, academic performance evaluations, and the writing sample. The student will come to the meeting prepared to discuss the updated personal statement and a direction for research. Committee members will ask the student to defend the selection of the writing sample – to reflecting on what was learned, and why the paper is representative of the student’s work. At this time, the committee provides feedback on the submitted materials and discusses the outcomes of the exam including any remedial activities that must be completed as a contingency for full approval to move forward in the program.

At the end of the meeting, the student is excused and the committee decides on the final recommendations. Each student is informed of his or her status and any recommendations for remediation within one week after the meeting. The advisor should complete the post-qualifying exam form at the completion of the meeting:

Doctoral Student Evaluation Form – Graduate Assistantship/Internship Performance

Student ___________________________ Semester/Year __________________

Advisor ____________________________________

Reviewer __________________________________

Directions: The ratings provided on this form are intended to guide doctoral students and the Department of Counseling and Special Education in evaluating professional performance in either a graduate assistantship (research or teaching) or internship. Please rate the student on the basis of their performance of duties associated with the primary responsibilities you supervised. For each item, check the box under the number that best describes the student’s performance using the following scale.

1 = UNACCEPTABLE: Based on the student’s performance this semester, this student is not prepared for successfully completing work at the next level. Student is not independent; student requires tremendous assistance from GA supervisor, and even with assistance, student does not produce quality products.

2 = MINIMALLY ACCEPTABLE: Based on the student’s performance this semester, this student is minimally prepared for successfully completing work at the next level. Student is minimally independent; student requires excessive assistance from GA supervisor, and even with assistance, student only sometimes produces quality products.

3 = ADEQUATE: Based on the student’s performance this semester, this student is satisfactorily prepared for successfully completing work at the next level. Student is independent; student requires an appropriate amount of assistance from GA supervisor, and with assistance, student produces quality products.

4 = EXCEPTIONAL: Based on the student’s performance this semester, this student is well prepared for successfully completing work at the next level. Student is very independent; student requires little assistance from their advisor, GA supervisor, and/or instructors, and with or without assistance, student almost always produces quality products.

N/O = No Opportunity to Observe: The nature of your interaction with the student did not permit an assessment of this particular area.

Post Qualifying Assessment Advising Meeting Summary Form

Student: __________________________________________ VID _______________________

Concentration: ________________________________ Advisor: ___________________________

After completion of the Qualifying Assessment in the SOE Ph.D. in Education program.
The student has:

☐ Completed prerequisites
☐ Completed and submitted preliminary program of study form
☐ Adhered to SOE continual enrollment policy
☐ Maintained 3.0 GPA
☐ Successfully completed Qualifying Assessment
☐ Completed and submitted revised program of study form

After review of the student’s record and qualifying assessment results it has been
determined that the student is:

☐ Recommended for Continuing Doctoral Status
   *Please submit electronic copy of Qualifying Assessment Portfolio to Office of
   Graduate Studies

☐ Recommended for Continuing Doctoral Status with remediation required
   * Please attach document outlining details of remedial plans, i.e. courses, activities,
   assignments
   and due date for completion

☐ Not recommended for Continuing Doctoral Status (please attach document with
   reasoning)

Student:

36
Appendix B

The Comprehensive Examination

Preamble

The doctoral advisory committee is responsible for determining the readiness of a student to be admitted into candidacy for the doctoral degree. In making this judgment, the committee considers a student’s readiness to conduct research independently, ability to analyze research critically, mastery of the literature in major and minor areas, ability to integrate information, and clarity of written and oral expression. Successful completion of the comprehensive examination is required prior to decisions about candidacy.

The comprehensive examination has two parts: a major area paper and an oral examination. Students demonstrate in-depth understanding of a research topic in the major area paper and mastery of the content related to their area of expertise. The oral examination includes a presentation of the major area paper as well as any other information the doctoral advisory committee members identify as applicable to the student’s studies.

Students need to pass all components of the comprehensive examination, successfully defend their prospectus, and complete instruction in IRB prior advancement to candidacy. The advancement to candidacy form is completed after the prospectus defense.

In conducting the comprehensive examination, the doctoral advisory committee shall adhere to the Graduate School policy.

Major Area Paper

For the major area paper, doctoral students conduct a substantive, integrative review of the literature in a specific content area related to the education of students with disabilities. The paper topic is determined by the student and chair in consultation with the doctoral advisory committee. The paper shall be of manuscript length (typically 25-30 pages) in APA style, be suitable for submission for publication in one of the journals of the field, and satisfy the chair and doctoral advisory committee that the student has the analytic skills necessary to conduct dissertation research. Students must (a) demonstrate the ability to create a conceptual framework and to organize the paper in a way that convinces the reader that researching the topic is critical to the field of special education and disability policy; (b) conduct an extensive, critical review of the literature; and (c) suggest implications for future research.

Students complete the major area paper as the culminating assignment in SEDP 709, with support from their committee and the instructor of Directed Readings. During the semester of Directed Readings, students are required to meet with their advising committee as a group a minimum of one time and are required during that semester to meet with their advisor at least two other times. Students must complete their major area paper during that semester or have a valid reason for receiving an incomplete grade for the course. Incomplete grades must be submitted with a plan for completion of required work (to track coordinator) and according to graduate school
rules, must be completed in the subsequent semester.

Most students will then complete the other two components of the comprehensive exam during the semester after completing Directed Readings. Full-time students may be able to do all three components in one semester if approved by their advisory committee. Students who do not pass their comprehensive exam may have one additional attempt before being terminated from the program.

Although doctoral students receive guidance from their chair and committee members in selecting a topic, organizing the paper, and revising the paper, they also function independently, as the major area paper is a key determinant of their (a) ability to comprehensively synthesize a body of research, and (b) readiness to design and implement dissertation research.

The major area paper shall be evaluated by the Advisory Committee members, the chair, and, at the chair’s discretion, faculty reviewers not serving on the committee. The SEDP Writing Competencies Rubric (used throughout the program to provide feedback on formal writing assignments; see Appendix C) will be used for evaluating the paper, and the chair shall communicate the evaluation criteria to the student. The rubric includes criteria commonly used in the review process for most educational journals (e.g., significance of the topic, inclusion of key research, depth of coverage, integration of ideas, appropriateness of conclusions, and written composition). The chair will determine (with the student) when the major area paper is ready for review by the doctoral advisory committee, but no later than the end of the semester after the student enrolls in and completes SEDP 709. Once the major area paper is ready from committee review, the student will provide a copy of the paper to all committee members. The committee members will have no less than 15 working days to evaluate the major area paper. Scoring rubrics of the student’s major area paper must be submitted to the committee chairperson. The doctoral advisory committee must determine that the major area paper is acceptable (based on the rubric) before the student will be given permission to schedule the written portion of the examination.

Oral Examination

The oral portion of the Comprehensive Examination has two parts. The first is a colloquium at which students present their major area paper to the doctoral advisory committee. The colloquium should include a presentation of the paper and time for questions and discussion.

All portions of the meeting will be closed to the public.

The doctoral advisory committee will determine at the end of the oral examination if the student has performed successfully on the oral portion of the examination. Once the student has successfully completed all components of the comprehensive examination, they will receive a pass.

Students should schedule two hours for the oral exam, to be divided about equally between the colloquium and question-and-answer sessions.

Timeline

- Student meets with doctoral committee chair and members (in a group or individually) to
discuss overall areas of interest for the major area paper.

- Student works with doctoral committee chair and other committee members (as appropriate) to develop the major area paper during the semester in which he/she is enrolled in Directed Readings. The doctoral committee chair and other members serve in an advisory role to assist the student in this process. The role of the instructor for directed readings is as technical and process guide while the committee provides guidance on the topic. Students are required to meet with their committee at least twice during the semester of directed readings. Grading for Directed Readings will include attendance in class meetings, participation in a minimum of two meetings with advisory committee members, and completion of the major area paper.

- Once the chair approves the major area paper, but no later than the end of the semester following SEDP 709, the student provides each committee member a copy of the major area paper. At this time, the student is given permission to schedule the written portion of the examination one month from this date. Additionally, the student is provided the 5 questions to begin studying for the written portion of the examination.

- Doctoral advisory committee members provide feedback to the committee chair within 3 weeks of receiving the major area paper. If the doctoral committee members believe the major area paper is acceptable, the student is granted permission to complete the written portion of the examination as scheduled. Additionally, the student is given permission to schedule the oral portion of the examination to occur no earlier than 2 weeks after the scheduled time of the written portion of the examination.

Sample Internship Options
To further apply their knowledge and develop specific competencies, doctoral students engage in a wide range of internships in research, policy, teaching, and community engagement. The following examples illustrate internship activities, however, doctoral students and faculty can generate additional options to build doctoral students’ portfolios.

**Research (Dr. Xu)**
- Design and conduct research on improving transition outcomes for Black youth with disabilities; (development of proposal for funding; presentation, manuscript development) – Colleen Thoma
- Research to policy link in doctoral programs: collect data on how other programs nationally address this competency and design research studies to address policy issues (school choice; teacher shortages)-Colleen Thoma
- BEST in CLASS - An IES-funded program of study targeting the prevention of emotional/behavioral disorders in young children and students – Kevin Sutherland
- Project KSR (early childhood special educator preparation project, funded by OSEP) - Pilot child outcome measures; conduct program evaluation; investigate effectiveness of specific technology methods for data collection – Yaoying Xu
- VCU Literacy Institute - Investigate administrators’ involvement in school related family literacy activities to increase family engagement and children’s school readiness skills - Yaoying Xu

**Teaching (Dr. Chen)**
- Co-teaching specific course prior to teaching the course independently –
- Clinical supervision of teacher candidates
- Mentoring teacher candidates in specific skills and/or development of research posters
- Designing and teaching online version of graduate course – Chin-Chih Chin, Laron Scott
- Designing and studying effectiveness of ePortfolios – Laron Scott
- Comparing the differential effects of online blog reflections and face-to-face interactions on teacher candidates’ intercultural competencies-Yaoying Xu
- Building and evaluating online learning community with international partners based on UDL - Serra De Arment
- Undergraduate courses- Dr. Scott

**Policy/Service (Dr. Thoma)**
- CEC, TASH
- IES
- Peter Paul Development Center – Kevin Sutherland
- Community-based needs assessment with Latino families about access and participation in community settings – Yaoying Xu
- Preschool evaluation project in collaboration with YWCA and Children’s Museum of Richmond - Serra De Arment and Yaoying Xu
- National organizations and agencies, such as AAIDD, OSEP, MCHB, CEC, ASHA, SRCD,
SEDP 773 Service/Policy Internship Agreement Form

The service/policy competency is met through an internship that is designed to give doctoral candidates an intensive experience in which they can become actively involved in professional service to the field of special education, and in particular, in the development and implementation of local, state or national policy. Specific internship requirements and expectations will be individually developed by the doctoral candidate in collaboration with his or her field-based supervisor and the faculty academic advisor, focusing on policy/community engagement activities as described for the doctoral portfolio. The amount of time devoted to the service internship should be approximately 8-10 hours per week over the 15-week semester, or 15-20 hours per week across the summer months.

Course Requirements: Each student will complete work related to service/policy, based on completing the required portfolio items first, and individualized items based on prior experience, current interests, long-term career goals, and the needs of the agency or program with which the internship is being completed. Suitable activities may include—but are not limited to—the following:

- in-service or pre-service instruction for special or general educators on a topic of expertise;
- development of training or curricular materials;
- development and upkeep of an agency website or data collection system;
- advocacy work with families or individuals with disabilities;
- training of parents of students or young children with special needs;
- work with an agency or professional organization investigating policy changes and/or policy recommendations;
- technical assistance to a school or non-profit organization; and/or
- development or upgrading of a program that serves individuals with disabilities or their families.

Doctoral Student Presentation Evaluation Form
Virginia Commonwealth University  
Department of Counseling and Special Education  
Ph.D. in Special Education  
Doctoral Student Guest Speaker Presentation Evaluation Form

Student ___________________________________________________________ Date __________________

Presentation Reviewer ____________________________________________

Setting/Topic/Presentation Summary:

Directions: The ratings provided on this form are intended to guide doctoral students and the Department of Counseling and Special Education in providing constructive criticism for doctoral students in the development of teaching and presentation skills. Please rate the student on the basis of their performance of duties associated with the presentation assignment. For each item, check the box under the number that best describes the student’s performance using the following scale.

1 = UNACCEPTABLE: Based on performance, this student is not currently prepared for successful completion of work at the next level (e.g., co-teaching a course, instructor of record assignment). At this stage, the student would benefit from basic adult learning instruction, modeling, and support to ensure effective, high-quality teaching presentations and effective student/participant learning and session satisfaction.

2 = MINIMALLY ACCEPTABLE: Based on performance, this student is minimally prepared for successful completion of work at the next level. The student is minimally independent and knowledgeable. The student would benefit from intermediate-level adult learning instruction, modeling, and support to ensure effective, high-quality teaching presentations and effective student/participant learning and session satisfaction.

3 = ACCEPTABLE: Based on performance, this student is satisfactorily prepared for successfully completing work at the next level. Student is independent and knowledgeable about the topic and effective teaching. The student demonstrated effective adult learning instruction, modeling, and student support. The presentation reflected quality teaching presentations and acceptable student/participant learning and session satisfaction.

4 = EXCEPTIONAL: Based on performance, this student is well prepared for successfully completion work at the next level. Student is very independent and very knowledgeable about the topic and effective teaching and student learning. The student demonstrated very effective adult learning instruction, modeling, and student support. The presentation reflected high quality teaching and effective student/participant learning and session satisfaction.

N/O = No Opportunity to Observe: The nature of your interaction with the student did not permit an assessment of this particular area.

</table>

Please briefly elaborate on the student’s strengths and areas for improvement so we may have a more complete understanding of any teaching/presenting challenges. Please return the completed form to the student presenter and the instructor (SEDP 703, 772) and/or advisor, in the Department of Counseling and Special Education within one week of the presentation.
